2.2 is not the last one. 2.2.2 is. Recheck it's version.

List of all scripts versions: http://sourceforge.net/project/showfiles.php?group_id=51947&package_id=56768

I think 1.9 is the one that is included in CP1.

Please post the crashdump.txt from your renegade folder.
2.2.x should not be causing crashes, if it is, I need the crashdump.txt so I can fix it.

If you dont have a crashdump.txt (instead, you have an _except.txt or nothing at all), that means you arent in fact running 2.2.x
