[20:33] =HT=Gamma: Your installed version of Westwood Online is compatible with this product.
[20:33] =HT=Gamma: Please reinstall the Westwood Online component.

=HT=Gamma gets that error message EVERY SINGLE TIME he tries to log into XWIS. I tried
giving him my copy of the Shared Internet Components to no avail (I even sent the Registry
entries over).
Gamma did nothing to his Renegade that would have caused such an error AFAIK, however, he
CANNOT reinstall because he can't find his Ren Disc 1. I am trying to get him an ISO image of
my Disc 1...however, it is very dirty (water spots, among other crud), so idk if it will produce a
working ISO for me...does anyone have any other suggestions?

You can install the components with any older C&C game than Renegade and update to newest
by goin online in Renegade.

Put your ren disk in and run the installer

when you get to choose what to install, untick everything except WOL Shared Internet
components. Install, and it should work fine.

This can occur if you've installed an older Westwood game like RA2.
