I never thought I would agree with him but really wtf is the point. No one cares about a private shitty bot you not going to share. N00bstories has a private bot that we wont share but you don't see us spamming about it.

I don't think you know the history of Deathk1ll (Camy1989). He ripped the bot already long time ago and claimed it as his own.

And as i see from the image, I can tell that's a ripped CloudyServ.

Too bad you failed to make your own bot

Ripping fun? LMAO... You should join Nopic.

Compare with CloudyServ.

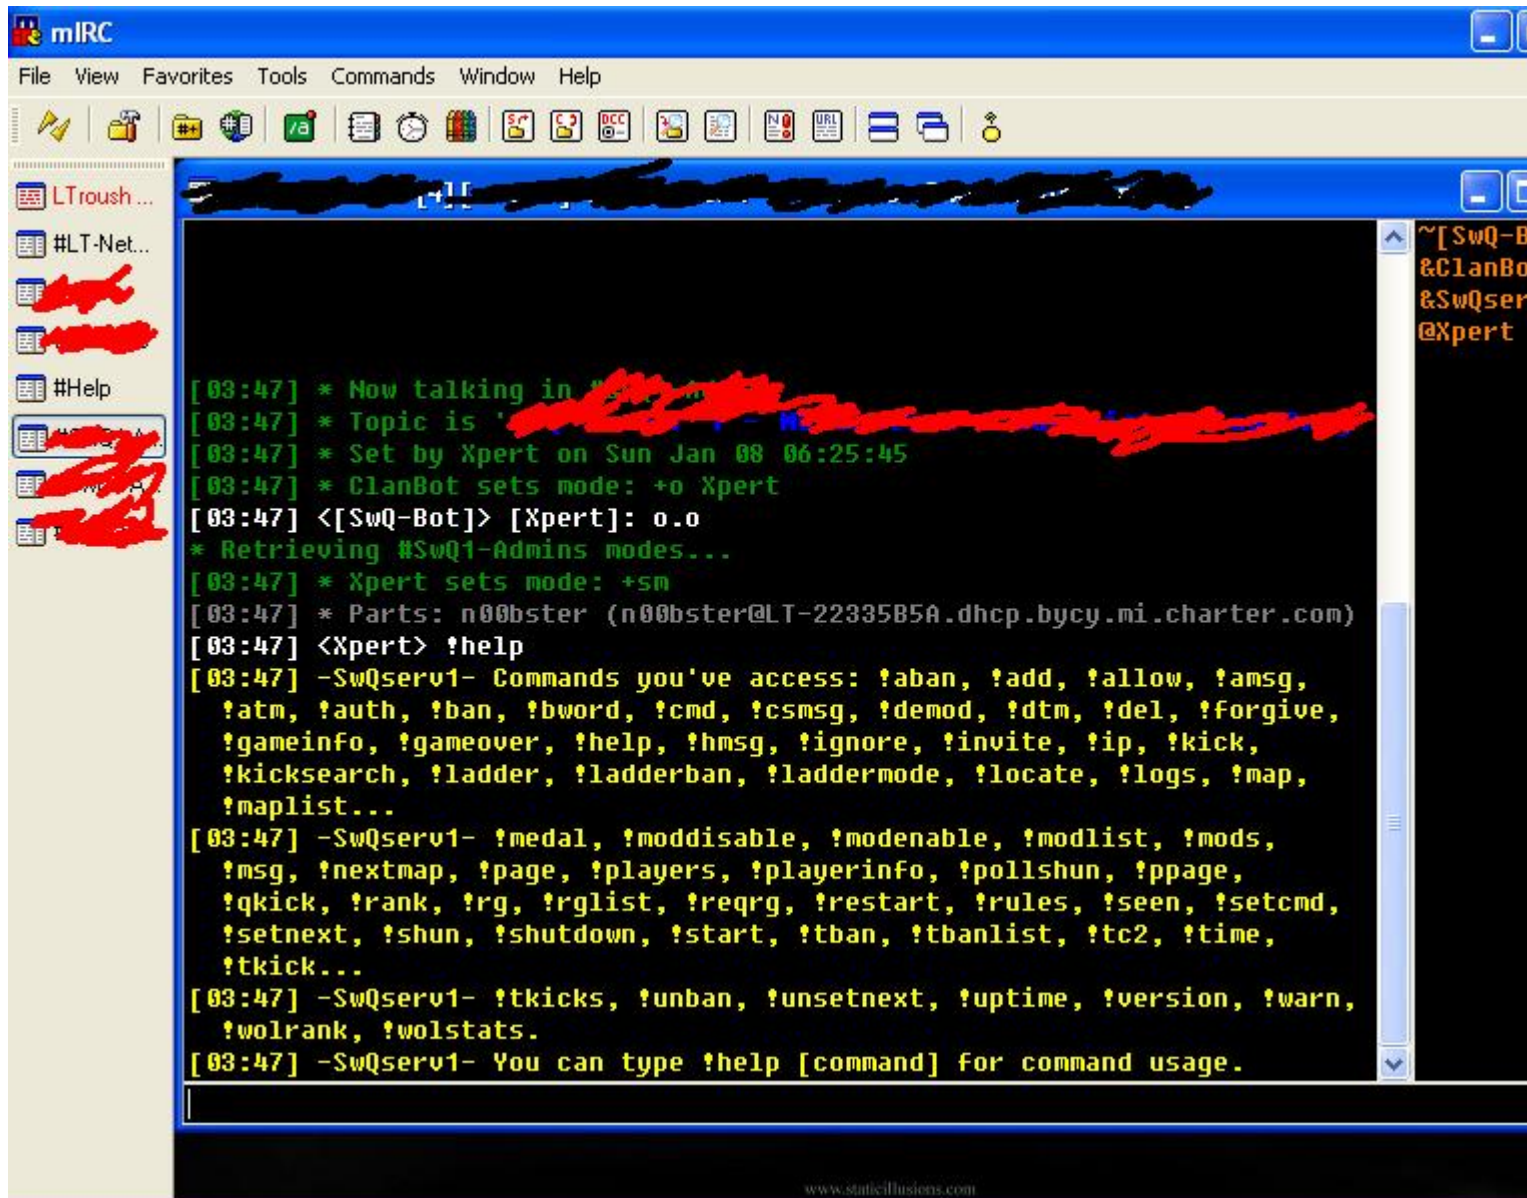

All that was changed was the command name and the text of some commands. LOLOL!

What had me cracking up the most is the way the commands were renamed. CS has them in alphabatized order in the Cmds.ini. Basically left the order the same and just renamed it.

For example, where !csmsg and !demod use to be at, it was replaced with !unmod and !wsmsg LOLOL!

oh joy, we could all make bots in mIRC. At least do it in something more interesting like C++, .Net, CGI. That way we know you weren't ripping.

In fact, all bots made in mIRC have probs been ripped from somewhere. Wilostorms bot is a rip and mod, yours is.

first your n00b clan did rip this from the CS bot...
all the fucking commands are the same and as Xpert said, you just replace some text

i agree with you CS does suck but why rip it? wanna become another nopic?

no1 cares about a bot that wwo made (laughs at the idea)
that clan has one long rap sheet. shall i post it?

bottom line:
you stole this bot and claimed it as your own.
i suggest banning this n00b from these forums

First of, just like to say, CS 0.98 doesnt sucks. It was just released. Its practically better then all the other bots out there. Maybe you dont know that cause you never bothered to download it but I will not criticise you people for your own opinions. Cause this is my opinion.

Not to get back to that ripping,
You didnt rip the bot? My ass lmao. Im not gonna try and beat the truth out of you cause it is blainly simple and obvious. I can point out more points about the similarities, and when I mean similarities, in this case, I mean the same EXACT thing.

Another stupid thing, does the "ripper" not know how to login as mod for the bot? Its funny, look at the SS, how you try using !login from ingame and nothing happens... Its cause you need to page server with !login genius? Or maybe you haven't gotten up to that part of the ripping yet...

And how bout that ranking mod system or whatever? hmmm... All you did was added extra lines of code copy and pasting the levels that were already there... And when was this bot created, or I should say "ripped"?

Bah I shall just call the ripper Nopic02.

Music get annoying, and the rank and mod systems in CloudyServ leaves nothing to be desired.

I'm sure some people will, but you can have them. People attract similar people to them. Judging by your attitude, I would be happy to have all of them in one server I can ignore. As for CS and lag, i haven't had any issues here, and I know the latest version runs well.

Anything else?

I know this is a very very old topic. But when I saw this, this literally made me pee my pants.

- 1) This guy can't spell if his life depended on it.
- 2) WWO - World Wide Owners never owned anything cause of no cw's, and they were to pussy to even fight gay clans like [SO] back in the day.
- 3) That bot is totally ripped. Look at the screen shot of klote's "made" bot and CloudyServ's bot. The commands are literally the same.
- 4) Wow, you can actually edit mIRC scripts! i r loal so preouad of u!
- 5) How would you know if CloudyServ lags if you previously stated you never used it? erm. Cause you were jeluz of how it kicked WWO's ass so you decided to claim it as your own?
- 6) WWO's original owner is YOU. It died cause you made this gay post, which all your little gay friends looked at it, and said "omgz0rs, theay figurezd out thatz we ripped CS, OMG, WE'RE GONNA GET 1337 PWNT"

You have also failed to respond to the post where somone requested proof that you made this bot. Personally, I would like to look at the cloudyserv.cs file he is in his bot directory.
