These are the original Medium Tank and Light Tank models used in Renegade during the beta stages. I managed to recover, improve and re-rig them so they're ready to go. Unfortunately, since vehicle replacements cause a mismatch error with Renegade, I've released them so that they can be implemented into maps for Renegade, with little to no difference to the stock ones, other than in the graphical aspect. All the textures, w3ds, icons, gmax and max material have been included in the archive. Be sure to give credit to me appropriately if you use these. Enjoy! (pictures provided)

I really like the Light Tank!

Someone better put these onto a map for me :3

...

The pictures ARE there, and there IS a download.

EXdeath7 wrote on Wed, 18 January 2006 15:23The light tank is already on a map, check C&C_Woodlands, I believe it was called.

Thanks Exdeath ^~

I tried C&C Woodland out. I see it has the same Light Tank and Medium Tank. But, they're different. Sanada added his own details and rigged them differently. Axel did his own details and rigged it differently so give them a try ^.^

Theres a slight difference idiot,
Axel has posted fixed BETA models of which he has done.

You have posted a LINK to the E3 models on cnc-source.

I downloaded it the day it was submitted to cnc-source.

I still don't get your point...

Are you trying to say they are cooler than the BETA ones?

Answer me this, why weren't they added to the final?

True, the BETA models weren't included either, but models near as damn it were.

You been going on about those models for like 2 years man. They're not THAT great. If they were, they would've been used in Renegade then, wouldn't they?
