How can i find out if someone has been killed by a C4 is the killer is holding another weapon?

i remember someone doing this a while ago, over a year ago now, gibberish, he had a cop and robber server and C4's didn't free you from jail, only people shooting did :S

Well... I'd say the first clue might be the earth-shaking explosion... The second might be the smoldering debris... The third might be flames... But that's just my opinion. I could be wrong!
