I was recently playing on a server when i saw some1 in an apc that had a red key card over it. So, being as curious as i am, i asked and learned it was a way to keep noobs from stealing vechs, and that you need to download a script to run it. I was wondering where i get this script, and if it interferes with renguard at all, thanks!

How to use the vehicle ownership system.

Download link if you want to use it on your server.
