I need someone with good documentation skills to help me write a readme file for Core Patch 2.
(no-one in BHS who can do it seems to be interested in doing it)
If you are interested, let me know (prefer someone who can talk on AIM/ICQ/MSN/Yahoo since its
easier that way)

I think I would not mind doing this, although...I'd just need to know a bit more what I would be
writing about.

Blazer said he would do it but so far he hasnt.
How soon would you be able to have it done? (I would like to go into CP2 beta testing this
weekend if possible)

I'd help you with it, but unfortunantely I have no experience whatsoever about any Renegade
modding/tweaking or scripts

But why don't you do it yourself? You write good English and I bet you know best what each script
does.

I'm assuming this has been taken care of since CP2RC1 has been released...

If not (or if in need for future developments), I have some tech. writer experience.
