first learn some propper spelling, then:

reinstall renegade; then
open renegade and let it patch itself; then
download and install renguard; then
let that update u to core patch 1; then

there shouldnt be any problems

Don't listen to GrimmNL.

Because of XWIS can't pass updates to the client you need to manually download patch 1.037:

ftp://ftp.westwood.com/pub/renegade/updates/Renegade_1037_En glish.exe

Download and install it. Now you should be able to play online.

GrimmNL is right... You can get the patch through XWIS. It doesn't realy matter where you get it though...

Im just curios if you can install the patch after already having Renguard installed.

Renguard should only be installed AFTER patching to 1.037
