Does anyone know if there is a mod for renegade that allows a team of 2 people or more to fight a computer team like in Multiplayer Practice (not another human team)? My little brother doesn't want to fight against me. Thanks in advance!

There used to be server sided co-op mods on WOL, I don't now if there still are any but that's pretty much the only way you can play on 1 team vs bots, since teams are set up by the server and not a map.

You could fight the bots on wilderness - you wouldn't be on the same team, but you could ignore each other.

I have made a pack just for this. My older brother wont play against me.

 http://www.oblivioninteractive.com/files/Bot%20Challenge.exe

Its several maps that you work together on. More challenging than most prefer though.

Just put the PKG in your Renegade/Data folder. Same goes for .mix

In the maps list, choose a mod package on top (there are none by default, so if you see one that probably means it's this one). After you select the mod package, you can see the new levels appear in the list. There, you can select and host them.

Yeah what they said.

Also the installer puts it right in the Data Folder.

EDIT:

And your welcome
