Hey yos. I've got a small problem with Brenbot. My admins have done alot of IPbans and i'm unable to get rid of them. Ile deletat them from all the lists of bans and kicks in the Brenbot folder. But when the players enter they still seem to be lpbanned. How do I get rid of these bans without Reloading Brenbot.

Thanks for any help.

Ask them, if they have other nicks, and try to unban them.

Banlist (Nickname bans)  
IPban (IP bans)  
RGban (RenGuard Serial hash bans)

You have to search these three tables to unban a player.

To do this you can use for example:

<http://www.multiplayerdownloads.net/downloads/ren/tools/SQLiteManagerSetup.exe>

edit:

Of course, if you know under what nickname the guy got banned,  
it is easiest to do from IRC:

!banlog nickname

!delban <ID>
