ok i got the FDS Directory and stuff for that but after i download the latest version of night regulator (v2.1) and i install it(it says installation was successful) i extracted everything then when i click on Night Regulator.exe to start the program it says there is an error and i need to reinstall

i need some more help

Sincerely,
I Need Help lol

Quote: i thought this was simple enough, but i guess not, as some people were saying "my installer isnt working"

extract EVERYTHING in the zip to any folder, then run setup.exe

>>>>(DO NOT UNDER ANY CIRCUMSTANCES OPEN NightRegulator.CAB)<<<<<

>>>>(IF YOU OPEN UP NIGHTREGULATOR.CAB, YOU WILL NOT RECIEVE ANY TECHNICAL SUPPORT, AS NR WILL FUCK ITSELF OVER AND IT WILL BE YOUR FAULT!)<<<<<

If when you load NR it will not accept your FDS directory, make sure the directory has a trailing slash \ at the end, if this does not help, run register.exe in the NR directory and try again

then what lol
setup just installs it though, it doesnt do anything else ><

yes, u install it...

Then perhaps go to the Start Menu? or go to the folder u isntalled it into? lol

yes, it is usually C:\Westwood\RenegadeFDS\Server\
