Hello all, I decided that I would make an attempt to make the advanced power plant that was cut from Renegade.

I've managed to do a Nod model, and ofcourse it isn't very good. But its a start, I will update it through time.

P.S - If anyone knows how to make aggetates for buildings (such as making smoke come from the second cooling tower) please tell me. thanks

Here are three screen shots of it In-game

Did you make it or just use westwood's?

---

So is that the regular powerplant with that other stuff added on? And what's the inside look like?

---

The Advanced PP is far larger.

@ JeepRubi - I used the Regular power plant and built off it. Westwood never released an Advanced power plant model, they only had a concept. I have a picture of it, so i will be using that as a reference.

@ dude#1 - the interior is the same as a normal power plant FOR NOW. I wanted to get a good looking outside before i worked on inside. I plan to extend into the blocky area for an inside.

@ cabal - In C&C 95 the advanced power plant is the size of a normal Power plant with just an extra cooling tower and a few more generators, It will become larger as progress is made

Yes I am Jeep, also - If anyone has suggestions for it, please post them.

---

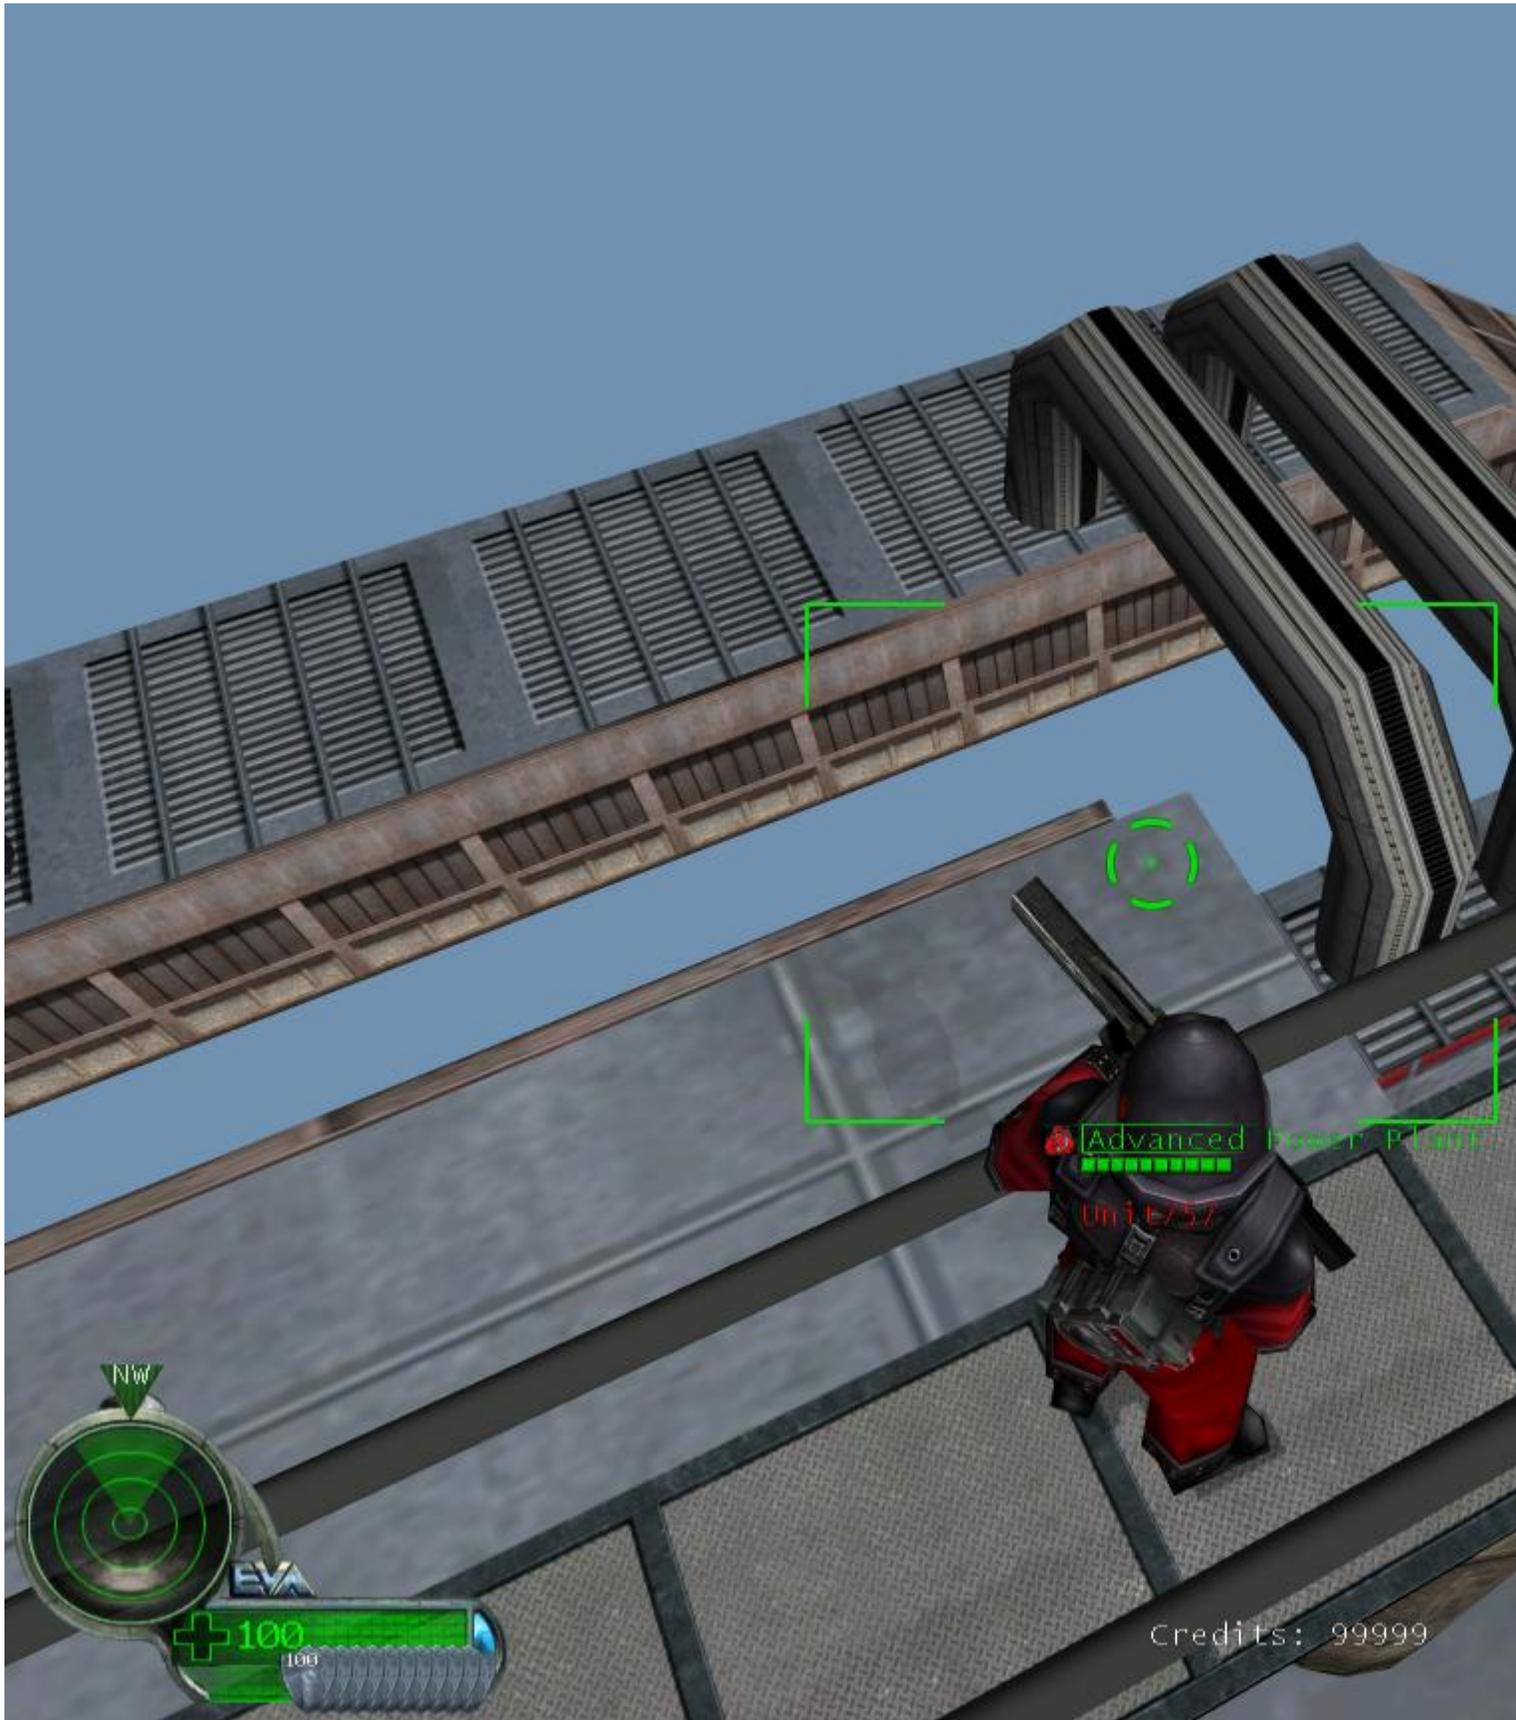

Here is a shot of a rough inside to the reactor room (i plan to add more), also it currently has no MCT as i have yet to make one, let alone figure out how. as well as 2 other outside shots, one from the walkway.

The exterior looks really nice. The interior does need work though.

Making PCTs and MCTs is easy. There is a tutorial at [www.renhelp.co.uk](http://www.renhelp.co.uk)

And about the smoke from the other tower, im not sure exactly but i think you have to make a bone and name it the emmitter you want, then you have to make it so that it only makes smoke when the power is above 0%... i don't know how...

The exterior and interior are both very poor. You should consider looking at your reference a lot closer and making your model proportional to it. You have a decent start but there's a lot to be improved.

---

The AdvPP in CNC The smoke attacks were not lined up like that. But i still love.

Ok, I will try to do a better model now. I will use my reference better.

also - Here is the reference I'm using

Notice the soldier to the right of the PP in the reference. It should give you an idea of its immense size.

Still, its good. I agree, but you cant make it too big.

Unless the tanks are that big....

You see where im going with this>?

Here is a screenshot after 45 minuites of work.

Try to give the cooling towers something else than just concrete. They'll look really bland without the lights and just concrete textures.

First of all it's nothing like the reference and second it's ugly as hell.

I'd rather have a tartan car.

I took a look at his model and it needs a LOT of work. The poly count is unneccisarily high and there are large gaps everywere so you can see right through it. If you looked at it up close or at any other angle id look like crap.

Spetz, u need some help.

---

Subject: Re: Advanced Power Plant  
Posted by [Spetz5](#) on Mon, 13 Feb 2006 20:04:29 GMT  
[View Forum Message](#) <> [Reply to Message](#)

---

who ever said it was done? and besides, you looked at the Nod model. Not the GDI one. I've closed alot of gaps, and BTW idc about the polly's, ive used the GDI one in a test map with a few friends, and they said with it, the terrain, a normal pp, wep, agt, bar, and ref. they noticed no change.

And next time, don't offer to do the inside, becuase your the one who got fed up with it.

I'm trying to do good on this, so leave me alone jeep.

also, cheek - It has no inside since I want to get the outside perfect before i move inside.

I have done better things myself, so according to your logic I have every right to show him what's

---

wrong with his work.

Just one sample of what I can easily create. So back to the subject, this needs to be improved... Assuming the artist is still working on it now.

---

---

yes i know it needs improvement and i wasnt really talking about you in particular you do soem very nice work may i add , just the peopel that said the GDI Adv PP was ugly and stuff..the outside looks jsut like the GDI base i see no problems with it. BTW does this replace the regular PP on all maps when its done or is it jsut for specially made maps?
