Hi I have been having this annoying error for 3 days now and I have the correct XWIS IRC channel and I was wondering if you could help. Thanks.

P.S. My firewall is off.

EDIT: Its ok I found the problem.

If you happen to come back to this post, please put what the problem and solution was. It may help someone in the future who has a similar problem.

This is only useful if you have Defender Pro. What happened was I hadn't played renegade for a while and I reinstalled Defender Pro and it didn't have a rule for allowing renegade protocols. I tried to login with the firewall off but it didn't work. Even though the firewall was off it was executing its processes. Then I made a rule for game.exe and game2.exe and bandtest.dll and all that other stuff and it worked. If this problem happens to you but its not a firewall read this:

Quote: I use to get that error. If you're on a router, upgrade the firmware. That helps. Canadacdn

If that won't help then download this tool that I attached at the bottom.
