Hi everyone,

It's been a while since i've left touch with the Renegade community, hope you are all well.

For those who don't know, in the past i have made programs for the game such as Ren Skirmish, RenWOLstatus, Renegade AutoComplete and Renegade BuddyList.

It's recently been brought to my attention that the buddy list app no longer connects, saying your "Serial is not in the database", which is misleading. Areilius posted feedback on TheCodeSmith.com asking if this was something to do with the XWIS change-over?

As I only know very little about this XWIS change-over, can you tell me if that is the reason? Have the WOL servers moved address? If any of you could share some light on the situation, that'll be appreciated. Especially if Blazer/Crimson/Dante and co could get in touch that would be good - I'm looking to get this fixed ASAP.

New WOL Server adress: c.xwis.net or 195.13.63.165

Ports: 4010,4011

Btw. I think there is a rule on XWIS that does not allow Bots on XWIS, for more information ask Crimson.

Man I am so glad you psoted about this. I still use your applications (Buddylist and WOIStatus) and for sometime now the Buddy List has not worked.

Putting out an updated version would be sweet and appreciated.

I might try this out sometime, not sure if it would work with +connect though.

Hiya

Once again, a year has passed and for some reason i decided to check back on these forums to see how things have changed. It's pretty good to see that a number of the 'regulars' that i knew are still posting (you know who you are)

I'm still interested in updating RenBuddyList, but i really need to find out who is now in control of the new servers, since the XWIS change-over happened.

I'd need IP addresses of the servers, and any new login details if it still uses the same methods. If it doesn't use the same methods, someone will need to contact me (PM?) with how to re-design it so that tool works once again.

Hope to hear from some of you.

~ Nick

Cat998 knows things like that,

Thank np for the drop by.

We just brought this topic back up the other day and here you are posting, coincidence I think not.

This was a great appy and would be awesome if you could update it.

Hey there, it's nice to hear something from the creator of renbuddylist again
Well, I guess it's just a small think (bug ?) that makes your tool incompatible with WOL. Maybe just the IP addresses.

It would be nice if you could add me in ICQ, MSN or wherever so that we can go trough it together.

Greetings - Cat998

The DNS names for WOL/XWIS servers are unchanged, so if you were using something like "renchat2.westwood.com", that will still work, as they updated DNS to point the names to the new IP. If you need more info, contact Crimson. You can also talk to Olaf over at striketeam.net.

P.S. Welcome back
