Hello to everyone,

I recently installed the C&C: First Decade and I want to play Renegade. So after I install it, I am asked if I want to run the configuration tool. Well whether I click "yes" or "no", I go to that tool. Then I will click OK, and the game will try to run. But the problem is that a window will pop up, then it will disappear and the game will not run. I currently have the latest patch that came with the game. What do I need to do in order to fix this. Thanks
