Ok, i have been using RG and CP1 for a while now. But just recently i bought C&C: The First Decade (TFD). And as if you may already know, in order to install TFD, you have to uninstall any C&C game u have on your comp. So i uninstalled Renegade. Including Rg and CP1.

I installed TFD and proceded to install Renguard. After that, renguard worked fine! But CP1 wasn't there. So I figured it had to redownload it... so i went online and waited and nothing happend.

After a wile i got impatient and downloaded CP1 Standalone. (no rg) And even after I install it... it doesn't work!

I don't Get radio icons, My loading speed SUCKS!, and I don't have any of the new commands (i.e Musica or Musicp) But the only thing that does work is the Ob sound. I can hear the obilisk.

Can some1 tell me whats up?
