I got an error message while trying to install CP2...I can still play Ren with CP1 but CP2 will not download correctly while this error occurs. Since I can still play ren it isn't urgent but I am curious.

I spoke to Silent_Kane and he said:

"IRC LOG"[23:37] <Kytten> I just got an error message while downloading the CP2 updates. I will paste screenshot

[23:38] <Kytten> <http://www.n00bstories.com/image.fetch.php?id=1171323593>

[23:39] <@Venomp0rnz> ARE YOU CYBERING WITH JER?

[23:39] <Kytten> Kane grow up....please

[23:40] <@Venomp0rnz> lol

[23:40] <@Venomp0rnz> Only jw can help you as he made the crappy installer

[23:40] <Kytten> uh great

[23:41] <Kytten> if I disable core patch updates on the options part can I just play with cp1 until he is here

[23:42] <Kytten> I would rather not uninstall RG to play

[23:42] <@Venomp0rnz> Think so

My idea worked and as I said before I can play ren. The error I got is this:

<http://www.n00bstories.com/image.fetch.php?id=1171323593>

Any ideas or feedback would be nice...

Many Thanks.

I have somewhat the same problem. But my RenGuard keeps finding an error and telling to download the corrupt files(maps). I have, and it keeps finding an error in the C&C_FieldTS.mix file I download. Heres a screenshot of it:

http://tibwar.hl2gamer.com/Files/Errors/RenGuard/renguard_error.PNG

I've downloaded and extracted the C&C_FieldTS file several times, and it won't download CP1.

Help would be much appreciated.

Thanks,
Nuclear General

EDIT: I think I know what the problem is. The file C&C_FieldTS.zip file that RenGuard tells me to

download is messed up, cuz XCC Mixer will not open it. It just gets an error and closes, but it opens every oher .MIX file in the Ren/Data dir. So if someone can upload or send me the C&C_FieldTS.mix file, I would appreciate it. Also, I think a RenGuard staff member should fix that file for download(Just a suggestion).

Thanks.

JW didn't re-do the installer?

Hi Guys,

I have the same problem as Nuclear General. Can anyone help please?

Thanks

I'm having the same problem as kytten.I even tried downloading the original maps again incase they were corruppted.
Any help will be greatly appreciated.

Same here, it keeps telling me to reload the Fields TS map and the file it has is corrupted and won't even extract itself.

extract the maps to c:/westwood/renegeade/data
and that will replace the other maps there is no auto extractor

The update worked fine for me, after I downloaded the "fixed" fieldTS.

People, please read the sticky threads.
Specifically this one

<http://www.renegeadeforums.com/index.php?t=msg&th=18818&start=0&rid=40>
It pertains to this exact problem (specifically people getting "old file not found" errors in the downloader)
