There was this one unladdered that I was in. There were 3 recon bikes. I got in one and it was really cool. So I think the reon bike is on the renegade disk. But I don't know how to get it.

It's in Lunar Landing and if you're running the editor check under the Nod vehicles.

I have the script that when you purchase a vehicle or a new harvester arrives a recon bike is also droped.The only problem was that the script screwed up the vehicles. Some don't move unless the host looks at them.

Lets try and at least attempt to not turn every thread into a flame war.The simple answer to your question is that you just cant 'get' recon bikes into a map. You must have the script mentioned above, or add them into your map manually thru the editor.
