are there any renalert servers online that people go too?

i wanna install it but i dont wanna waste the space if there are no servers on it

n00bstories will most likely have at least one server back up when .9935 is released. Right now people mainly play on private server at set times.

Sometimes you'll see threads planning a game on [www.apathbeyond.com/forum/](http://www.apathbeyond.com/forum/)
