I can't seem to download renguard. I've tried attempted all sorts of ways to get it to download. I have also talked to other renguard users and they can't seem to figure it out. This is a ss of the problem i am currently having with downloading renguard.

Check in this thread: <http://www.renegadeforums.com/index.php?t=msg&th=18641&amp;start=0&rid=2>

You will find a post by me with a "manual install" for renguard.

So did you lie to him? You just posted that you don't know where to find game.exe or game2.exe  
Then how did you rename game.exe to game2.exe as blazer suggested?

If you are computer illiterate heres a tip, stop playing video games. Stop using the computer.  
Nothing I hate more than a fool that doesn't know crap about computers but tries to use one.  
Go get a new hobby. Like bowling.
