when i make a new name on renegade and login in with it it gives me no servers on the servers listing.

whats up with that?

cant make any new accounts anymore?

ps: doesnt matter what email/name/password i use

keeps giving no servers.

on my older names it does still show the servers and there's n_P

This is a large failing of the XWIS system.

If the servers don't show, then the account you are trying to use will already be registered, or you have reached your limit of 4 registered nicknames.

and how can i take away one of those 4 accounts.

I used a different email btw. and there are idd more then 4 accounts on the list to login with.

should i just take them off and make my new name the fourth?

I think you still use the old method of registering by the website. That isn't needed anymore! It doesn't even work anymore. Now you just need to log in with a name and password and if it doesn't exist, it creates the account. But there's a max of 4 nicknames per renegade serial.

I don't think you can delete a nick. :-s

I noticed that the limit only shows up after a while.

Does that remove the nickname from XWIS, or just remove it from your drop-down of known logins?
