I use numpad keys 1,4 and 7 for my gaming and now whenever I press them my man takes a bow or something equally stupid, how can I fix this please and keep my bindings?

Thanks

Edit keys.cfg with keycfg.exe or with notepad.
Remove the taunt settings (or reassign them to something else).
Problem solved.

If you arent using the SSAOW keybindings at all, you can just remove keys.cfg alltogether.

I usually have numlock turned on, so it sometimes gets annoying when I try to use the taunts and instead find my weapon switching ^^ Is there any way to make Renegade only change weapons with the main numbers, and not the numberpad keys?

(kinda exactly the opposite to what onthewall wanted ^^)
