I encountered a strange error today. Im running Renegade in C&C:TFD and I manually loaded CP1 and then installed Renguard. After that I tried to download CP2 but it tells me

"Old File not found. However a file of the same name was found. No update done since file contents do not match."

The problem seems to be occuring in Always2.dat

(PS. Sorry if I double posted I put the original in the wrong section and couldnt delete is :S)

that is kinda wierd.....

did you accidently overwrite it and also accidently copy the new file so it would say it found a file of the same name????????? you should check....
