Well I've been having this issue for quite a while now. Renguard says my game.exe is corrupted and kicks me whenever i join a server...

I downloaded game.exe from renguard.com and thought it was over for like a week. Untill today when it started again...

Please help me fix this.

DarkIDz

Simply wait a while before launching Renegade from RenGuard. This is usually a spurious message caused by a race in RenGuard.
