I usually play on n00bstories, since the people there are neither too skilled or too n00bish for me to handle. When I want to mix it up I play on JellyServ's CP2 maps server.

What about you guys?

Usually n00bstories or UNRULES-GSA, though I've been playing a lot of Fnfall's lately. If it's got marathon or co-op games, I'm all for it.

Usually FnFall AOW/Marathon/Sniper, but I can be found on LTRoush CTF every now and then. I'd like to see the HazTeam AOW server come back online, too...

Well, when I played renegade I played at the Black Brigade server. I quit the clan and pretty much renegade after a, lets call it an interal scandal caused the clan to break up and I see today that the clan is back in some form. Too much corruption for me to handle and yeah, that's where I stand today.

#1 N00bstories
#2 Jelly

We've never really died... we're only about half dead.

I play on the Black-Brigade server.

The only servers that I play on are N00bstories.com and [NE]Public Warzone. However, there has been ony few people on the Warzone for the past few weeks, so I don't really play there any more.

Sanada78 wrote on Mon, 03 April 2006 15:52Was playing on n00bstories but 40 players is too much for my crappy lappy to handle. =(

What computer do you have? I have 1.5GHz Celeron M 370 with GMA 910 and 512 MB RAM and Renegade runs pretty smoothly for me.

In fact, for some reason RenAlert runs on my computer even better than Renegade

I got banned from kindergarten because I don't play well with others.

I play on [NE] Public Warzone most of the time. Sometimes I'll mix it up on n00bstories.com AOW/CCM. I'm a mod on Public Warzone, otherwise I'd probably just play on n00bstories.

When playing I'm usually found in Fnfall's sniper/500 servers... With a little bit of LT CTF server every once in a while.

I normally play on NoN00bs server and sometimes play on n00bstories. I used to play a lot in Black-Cell's marathon server.

Haha, I don't know how you manage to get yourself into so much trouble MrP. I don't play much anymore, but If I do I'm on either UNRULES GSA or n00bstories.

In fact, for some reason RenAlert runs on my computer even better than Renegade

AMD Athlon XP-M 2400+ 1.79GHz
768MB DDR PC2100 - 32MB for GFX card
Radeon IGP 320M (Main cause of low FPS)

This laptop is over 2 years old so I'd expect it to do badly. I get around 9-20 FPS on average with everything set to as low as it'll go @ 800x600. I'm only using it cause my desktop blew up.

Well, I play on Xphaze... or on the one where:
"your serial is invalid"
:@
