Either you like me, hate me, or rly dont give a fuck, im back. Lost my Ren for a year untill TFD came out. Its good to be back, anyway...I want to make a texture request for the Nod light tank. Anybody here interested in re-texturing the tank with the textures of the Nod bradley from the betas? If I could use the actual model ingame, I wouldnt ask for a retexture, so just a reskin of the v\_nodtank.w3d will have to do. Of course, i'll post up the texture files of the bradley if anybody actually wants to do it...

Lol mybad, I read the 1st sentence and stopped. I have so many boards I been to posting on latly, and I am trying to visit them all before its time to get some sleep.

That's a nice model .

Very beautiful, is it not?(jesus, I sound like Kane here.) Have a version we can plug in like a normal aggregate model that'll overwrite the lighty ingame?

I don't see the link for the download in there, all I see is "Edit: As soon as I have uploaded it I will post it."

oh, I was going to set them all up. Then do a temp preset package for modders.

The last thing I was working on was the Nod buggy, I never got Visible occupants setup but I got the steering wheel to move when you turn.
