Just felt like bragging...

I'm writting walkthroughs for Renegade's single player at <http://www.RenegadeWiki.com>. Out of all the topics, this is perhaps the most extensive and thankless of them all.

Of course I'm nowhere near done. I've only gotten up to the 4th mission or so. Still, I'd appricaitte some constructive criticism from you guys, if you have the time...

I have played this game online like forever but never actually bothered to play the single player, lol. Anyway, it is a good thing people are willing to spend so much time contributing to this community. I say keep up the good work!

It's been done at <http://planetcnc.gamespy.com>, but the walkthrough their is terrible and undetailed. Besides, even if there is a walkthrough out there, RenegadeWiki doesn't have one yet.

You are writing walkthrough for singleplayer and we care because...?
Maybe you should change title of this topic, because it has nothing to do with being a good person.
I sometimes find walkthroughs pointless. Would prefer if people just give you tips for some parts that are pretty difficult and so on. That way, they won't spoil the game for you.

I think it's absolutely fantastic that you're putting this together. It looks really great so far!

Great job, Dover. I only regret that I finished the game before said guide was written. The other

guides were... words my parents will not allow me to type, and I was better off without. But this... this is beyond hum-, er, I mean average. I believe the term is "Kudos." Have them. Have all Kudos.

Yeah good stuff, i could never write it because I get way to many details and pictures in there.

Gee. . .
I wonder. . .

Could it be that it is because these are the official Renegade Forums? And that other people besides you can benefit from this?

I have used the planetcnc walkthrough once, when replaying all missions on hard and it helped me quite nicely.

Well, if you're wanting to hold people's hand so they can finish the single player then you have my blessing.

I too however, believe more in tips and hints to at least keep the fun in it.

The offical Renegade site had a walkthrough.

If you mean westwood.com, or what was once westwood.com, it was more or less destroyed by the great people at EA. It may exist somewhere on that site, but it isn't worth the trouble to look for it. Thus far, Dover's is the best I've seen.

PS: Your article on the Ramjet was pretty good. That was you who wrote it, right?

I don't think so...I may have cleaned it up a little, I don't remember.

I did write the article on the Orca/Apache though. However, that article is saturated with my personal experiences and tactics and dogma and what not...

Oh, I remember the Orca [guide]. It's funny that in this game, you want the "high-ground" in an air-craft, but it is true. I plan to use your guide to beat single-player on commando difficulty if I get the time.
