Hi all,

I'm in the planning stages of getting creative with renegade again and I was wondering if anyone knew the maximum number of Muzzle bones that can be used on a turret or vechile?

Thanks!

(I searched but couldn't find a definate answer)

Just found out from laeubi it's 2 sets of 2 (like the mammoth tank) if anyone is interested.

So no 4 barreled anti aircraft guns then

You could make 4 barreled anti aircraft guns just have it only shoot out of two barrels. Or, make two of the muzzle flash things (forget what there called) linked together so it would look like two are firing at once.

.... if you ever figure that out I would be very happy also, what about weapons having multiple muzzles? (EG muzzlea0 and muzzlea1) I tried it and it does not work at the moment (even though the readme that came with mod tools says it should... >.< maybe they removed that or never got around to setting it up...)

I meant player weapons (such as a multi-barreled rifle (ok, wierd example, but you get the idea))
