When anybody plays on servers like Dragonnade, Black-Cell, or my favorite: n00bstories, (maybe they are all the same , I don't know) the players have the ability to lock vehicles, to use the !buy\_veh command, have the crates on the map, become a veteran, and so much more, is there anything I can download to have those things, so when I host a game the players and myself can use those things????

--Thanks

Use something like brenbot,BlazeRegulator or NightRegulator. And also download the SSAOW 1.5. Search on this forum.

Yea, can you please give me a link?

--Thanks a million
