Can somebody go on their renegade config on the audio tab and take an ss and post it here? because my sound is messed up i hear things differently. This all happened when my renegade froze for 15 seconds about then closed to renguard. I tried to play and after i killed renegade the config popped up and then it said Renegade has encountered a problem Send or dont send so i couldnt get on renegade. Then i restarted my comp and renegade worked but got the different sounds. Thanks to anyone that can help me.
Its the same sounds but like i hear them differntly like im farther away than i am. Oh i cant really explain.

My sound has WORSENED!!!!!!!!!!!!!!!!

The only things i can hear now are Unit Ready and Nuke Deployed and Ion Deployed.
HELP!!!!!!!!!!!!!!!!!!!!!!!
