Well after i downloaded it, And i opened the file i notice all was there was a server2.ini & a bunch of .txt files.

I was wondering how can this make a coop server?

Ive asked on the MP site but no1 helped

No shit you use a FDS...

I put the files in the correct places (server2.ini in renegade_fds & the .txt in the data folder) but I dont see how that makes a coop? Wouldnt you need the maps?

coop P Pronunciation Key (kp)

n.

An enclosure or cage, as for poultry or small animals.

Slang.

An uncomfortably confined space.

A prison.

Because they're all fucking retards. They all seem to be mourning zunnie's "retirement".

I never helped because I never wanted Zunnie to release it in the first place. And not for the reasons that you might think.

And yes we do miss Zunnie, J-ball430. Zunnie was a cool guy and nice to have around. But why are you calling us retards? It is this sort of shit that made Zunnie leave this community anyway. This place doesn't need little shits like you, but it does need people like Zunnie.

MP is a worthless community. I've known plenty of people who had been a part of it that are no longer part because of the sheer stupidity of zunnie and the rest of the community. I'm not saying that there aren't exceptions, but there aren't many.

Well I actually own the MP-Gaming.NET site, so calling it worthless isn't appreciated really. People may have come and gone, but it is still flourishing whilst others dwindle and die. Infact we have never had such a boom in forum members like we have had in recent months. I am curious to know why you think Zunnie is stupid, and why you dis-like the MP community. We haven't ever done anything to hurt anyone, yet some people seem to have a fanatical dis-like for it. It is something that has bugged me for a long time, I just can't see a real reason.

Pretty sad thing to say considering all the they MP did and/or helped do for the renegade

community

Its people like you that ruined renegade to me.

I made mission map M10 the last few weeks. Dudley was kind enough to add it to the package

You can download it here: <http://www.game-maps.net/index.php?action=file&id=562>

If you were already running v1.75 then just:

- extract m10.mix to \server\data\ folder
- extract all .txt files to \server\data\ folder of server
- extract objects.ddb to \server\ folder
- extract server2.ini to \server\ folder

Have fun and i hope you like it.

So you believe that people think Zunnie is stupid, and the MP community are retards because he posted his personal thoughts about 9/11 on this forum last month?

That doesn't quite cover why people have thought this before that time.

Seriously PM me if you want (i have taken this off-topic enough) with why you dis-like MP and think we are retards, or post away, you won't hurt my feeling . It has been annoying me for some time. IMO MP has only added to the ren community
