Is there a maximum number of barrels a weapon can have? i have got an idea for a user controlled base defense which has four barrels. Is it possible?

The APB Allied AA gun has 4 barrels, so I'd think it would be possible.

Yeah, you can have up to four barrels but they're in two sets. So you have barrels 1A 1B and barrels 2A 2B. The Mammoth Tanks has this set up I believe. I think they'd be problems with trying to have all four barrels as like one gun or something.
