When i try to run the renegade patch 1.037 it says "old file not found however a same name file was found. No updates done since file contents do not match.

When i try to the game it says" the producer entry point?detect_bandwith@@yakkhaahaakkpaut bandtest settings struct@@pad>@z could not be located in the dynamic link library bandtest.dll"

Could someone tell what in the world this means and how can i fix it?

Did you install renguard before installing the update? That could explain.

Uninstall Renegade and reinstall it, preferably in a different directory, following this guide:
http://www.thekoss2.org/new_game_info_ren.php

I'm still having the same problem nothing was fixed.

When i checked the patch it froze on m09.mix

Are you using the first decade version of renegade? From what I remember that come's pre-patched to 1.037, and therefore you would not need to install the patch.

If I try to get the patch from ingame it goes all the way to the end. Out of 18.7mb it says 18.7mb and 1 sec left but never finishes
