I was wondering if it would be possible to change the colors of the words when your playing renegade, mainly the paging text color so I can read it when im playing. i don't know how id do that because i have no modding experience.

Thanks if anyone can help me with this.

Well, you might be able to if a scripter were to add it into an SSAOW update or a scripts.dll update. But as far as I know, it isn't readily possibly at the moment. I would love to have this also.

If its black then you cant see it if its a dark map, maybe more of a dark tan.

Great question, it would be pretty cool, I am sure that it is possible, I will post the way to do it when I figure it out.

By the way, at the PTs I think that the picture should be changed, like to a camera ?monitor?, it would be pretty cool!
