freewebs >.< ughh

if your serious about making a mod surely you can get better webhosting than that?

uhmz.. why exactly does your test map .rar file contain all the level editor stuff?

EDIT: Not only that, but the .mix is almost 200mb, and it does not even work when you try it? rofl...

you only need the .mix, the level files and such are not needed to run a .mix (or shouldnt be if you have set it up properly)

and the website is certainly an improvement
