okay,

Can someone please tell me how i make maps selectable when i use a .pkg mod package?

I made my mod then i extracted it as "test1.pkg" and when i went ingame and went to map select there was no maps there   please help me

I am using LE but i havent modified the maps, just the presets and such.

i just want people to be able to join using the unmodified maps but with my mod on

Take the objects.ddb from your mod folder and put it in your fds directory. If you are using ssaow rename it to objects.ddb

then its not a .pkg your after...

copy the objects.ddb from your LE folder, put it in your servers data folder and rename it to
objects.aow (from what I understand anyway)

when i do that only part of it works , the explosions arent visable to people and stealth doesnt
work on units i put it on
