So today I decided to try and play Renegade online again after a long time... I never had problems with it even after the WOL to XWIS change, but this time I get to see this when I try to log in...

I can't reinstall the game because that would screw up some stuff with level edit. And even if I could im not even sure if it would fix this because well, I got 1 of those "cheap" copies EA sold a few years back and they didn't have valid serials with them...

Anyone know why the people that own XCC decided to do this?

I think they did it so that people cannot register alot of nicknames on abunch of different serials. 1 of the reasons anyway. Paste a valid serial into the register under Renegade.

There's a sticky in general discussion - forum with a program allowing you to change serials. But if it has always been valid up to yesterday, it should still be...

Yeah, fuck XWIS.

I've used 5 different serials (or more, who knows) including newly-purchased retail ones. And all I get from Olaf and his crew of tardkarts is "lol get a valid unshared serial!" When did this "unshared" bullshit start anyways? The real C&Cs were always all about sharing your disc and serial with a friend.

(Proof they are killing the C&C spirit!)

I never had a problem with it untill now.

I'll try that program later...

maybe part of their contract with EA specifies they have to encourage people to go buy more stuff from EA?

I used that program and I re-entered my original serial (and only serial I have) and saved it... But I still can't log in?

Any other suggestions?

Contact Olaf... errrm no, ignore this, that won't work. Not really :-S. Maybe you can ask your favorite server(s) to provide you with their ip and port so you can direct connect.

Tried renaming 'WOLData.key' to 'WOLData0.key'? Works for me and quite a few other people with this problem.
