Seems like he hacked the server too. I got something that wiped out the whole renegade directory through renegade.

Cant help much since my FDS hasnt been hacked. I would reccommend reinstalling or uninstalling and installing.

haha, could be. But I berely run my test server and I was under a different nick when I was testing. Strange they wouldn't just target my main Gameserv

Maybe someone just wanted to test out the h4x without running a big risk, hence targetting your test server.

i can be a ass

or i can be nice

lets just say.... you got the best modded maps serv out there, and mabey someone hosting a server in the right lines tryed to do it to you, but got the Host name wrong

or as Gatzow said..... just testing flooding a FTP out till it crashes

eather 1 eh .

tho it would be better if it did crash your main server out just joking with ya ... or am i?!?!?!?!?!?
joking for shizzel
