Hi. Is there a way to block other players from seeing what game you are playing in the buddy list? Because there is a very annyoing (and stupid) person playing every game I'm in!

Yes, there is, but if the person who's following you around always plays in your favorite server anyway, you can't really get rid of him. Here's how you can keep him from finding you from outside of the game:
Step 1 - go to the Options screen:
Step 2 - uncheck this box:

You may also want to do this:
Add him to that list there, and he won't be able to page you anymore.

LOL, you too? I have that same problem. The name may change but he's always there.

Thank you! Looks like we both have the same problem Mission. Lets see if he can find us now

Edit: It doesn't work! He can still find me!

he's probably locating you using !rglocate then.... which you can only prevent by not using renguard

or join a server where you know the mods and can get him booted out...

Not going to happen, I always use Renguard. An eye for an eye. You just have to be more annoying.

The person doesn't have renguard so he can't use !rglocate, right? I tried to !forcerg him but it needs more than one user to get rid of him.

if he has access to a servers irc channel he can use rglocate.

he could also just use http://www.renguard.com/locator.php
