In multiplayer you have the player list which holds information on your stats, kills/deaths, points, credits, etc. I need to change the text size of it, as it has become blurry. This is making it hard to read... And I have perfect eyesight.Help would be appreciated.

Change the point size to like 14, one at a time and see which ones blow up

I changed all the point sizes to 14 and the font didn't change but others did. So it isn't in the stylemgr.ini

I have tried all the resolutions I can do, still doesn't work good. Re-installing means I have to get all the patches.   And I wasn't spamming, I was simply bumping. [December 28, 2002, 15:47: Message edited by: DDR]
