Has anyone or does anyone know why sometimes when you login to Xwis/WOL Renegade stops responding for about 2 minutes than suddenly continues normally. This usually happens around after 3 seconds after logging in.

it's usually while it gets the server list, sometimes it freezes for me as well, for about 2 seconds, but usually it just works normally.

When it was on WOL it would freeze for about 2 or 3 minutes, XWIS seems to have mostly fixed this...
