I myself have seen cyborgcd's models (current ones)... he has taken the advice of everyone here, got the models with a low polycount and they are very kick ass...not Westwood material... but they get paid bank for that, and i don't think ANYONE here does Westwood quality.now... before you all go ***** his work... remember that you may have not seen it all.

it might be, i just wanted to state my opinion grenader8, he is a good modeler, and is getting heavily trashed for his early works.

Ok here's my problem. From what he's posted I see him as a mediocre modeler. Now from a reputable source it seems he's gotten better. Alright but I haven't seen it. What I have seen is him post on every one else's threads saying how his models are better. Maybe they are maybe they aren't but unless he's going to post his work I don't see why he should be able to put down others. I don't think anyone should put down anyone ever. You tell them why you don't like their model in a polite manner then tell them how they might fix it.
