auf Englisch:

What he's trying to say is that when he installs RenGuard and joins a server (RenGuard protected?), the game hangs up if he does something but I don't know what. I only have two years of German so I only understand most of his sentence. I know there are better German speakers in this forum.

Das ist ein CP2 problem. Du darfst keys.cfg in deine renegade/data folder erledigen.

In English: he has the keys.cfg problem, he uses numpad. I tried to explain him how to solve this.

Can someone fill in the blanks? I once took a bit of German, but I can't get hardly any of this:

Hi. When I install Renguard and join/load a server it ____ very _____ in play-- _____ the play-- _____ when I _____ and _____ When I install Renguard.

Yeah, I suck at German. Give me a break, I only had 4 months. ...at some point in history.

wenn is "if", not "when".

"Hi, if I install RenGuard and join a server XXXXXXXXXX but then the game locks up if I XXXXXXXXXX. That only happens if I install RenGuard."

that's the most I can get out of it. I don't translate it word for word, for I understand German grammar. But obviously my German vocabulary sucks. Goztow, maybe you can explain the parts I don't understand? just for learning experience...

I miss German class. School systems in the South do not recognize German (or English, for that matter), as an important language.

Hi, if I install renguard and join some server, it loads quickly but when I walk forward and sideways the game freezes. This only happens if I install renguard.

That's what I understand from it, got german 4 years, 5 years french, 5 years english, 5 years dutch, and I will not miss french and german at all when I will not have them anymore next year! I don't like learning languages but in the Netherlands you have to learn so many... I have just got german reading last year, I'm not great at grammar etc, and not great at german at all, but I usually get the meaning of things, butam not entirely sure whether it's 100% correct Hope I gave some hints here though, lol

<http://translation2.paralink.com/>

Its mostly Spelt wrong, might be easier if it was spelt right...
