dan

i have a 12MBps commercial connection which is the highest connection possible without investing in a \$10k server box

Its primarilly for my dads company work server, but I allocate about 50-60% for my needs. I have seen other people get 20-40 ping in my server, and have never recieved complaints about lag

As for my comp, its a decent 2001 P\$, 256 ram, etc, but it doesn't require much to get 60 sfps.
