here it is ive tried now all night and its about 3am in the mornning. and i cant get it to work on TFD here some pics

Now the first Pic is My official TFD renegade Installation loctaion. nuff sied..

Second pic is the directory im installing Rengaurtd to. Notice how this is correct to step 1

3rd pic is this stupid glitch witch might be causeing it. note this is after step 2.

and step 4 is what i get when i click on "next" A.K.A Install.
Now ive done everything i can think off. even tech support on forums. ive done every thing on this too

http://www.renegadeforums.com/index.php?t=msg&th=19350&a mp;start=0&rid=21341.

Now please will some one help me. BTW yes my pc Can run Renegade fine

try installing renegade to the original(original as in thats where it would be had you bought the game on its own) directory, which is:
C:\westwood\renegade

to see if that works

The First Decade doesn't install into that directory; don't confuse him.
