I was just wondering if anyone has/knows where I can download a Renegade ObjectDock Docket or PNG (around 120x120 or above).

The current one is the standard icon file, which has a low resolution:

you can easily make one. Find the largest version of the Renegade logo you can, and just cut out the "R" and crop it accordingly.

That's the best I can do with paint. It lacks the red shadow of the actual icon and looking at it with certain types of backgrounds (white for example) makes it obvious it was done in paint; but it will do for now.
