I wanted to work on something but find it very hard to do so because my gmax and renx backgrounds are all red and it makes the textures look all red. How Do I fix this?

Only help i can provide is telling you that renhelp isn't down.

<http://renhelp.laeubi-soft.de/> Use this link.

There was no word from General Havoc at his home address in the Uk. I sent a pen letter to him for information and for the possibility of Laeubi and I to take over the domain since he is no longer with the community. However there was no reply and no return of letter.

Its been a good 3 months, so at this point I would suggest that everyone update some URLs.

[http://renhelp.laeubi-soft.de/Downloads/Q824136\\_WindowsXP\\_EN\\_U\\_x86\\_MID150401.zip](http://renhelp.laeubi-soft.de/Downloads/Q824136_WindowsXP_EN_U_x86_MID150401.zip)

Just do the same for the download URL, no biggie.

I would try two things at this point, order them in which you think would help you more:

I would clean the registry of any Gmax/Renx related entries.

I would change my renderer to one of the other two options. I think the three were Heidi, Software and DirectX.

I was going to say, you probly changed the background.

Short cut for it is "Alt B"

you may of pressed that and somehow chose that color... or something..

But background comes in handy when your modling a vehical or something from a picture, all you

need to do is set it there so ou can just look at the background to tell what you need.
