Hey

i would like to know

How would i change the Auto rotates in the server and change the rules

cus i would like to add some auto rotated messages for our clan server and change the rules and so on

is there a way i can change

1st. the auto-rotates
2nd. a website for the !website command
3rd. change the rules

help would be aprtaied

thanks

alex

1) autoannounce.brf
2) if your using 1.43 change it in the serverinfo.xml file
3) messages.brf -> first line = !rules

open all the above with notepad.

If you using brenbot 1.41, I am not sure where that stores the !website command... or even if there IS one... perhaps the second line in messages.brf

There isn't a !website command within 1.41 but if you use IRC I could quickly write you a script that will display <yoursite> when !web/!website/!site has been said.

indd, but as he said he has a website command we must assume he has 1.43... (which I didn't think of before tbh)
