Hi after some back breaking (or finger breaking) animating i have finally rigged the old reborn rifle for renegade, it is still in beta and will be updated.

It is a very nice alternative, to get away from that weird machine gun

The rifle has reload animation (still working on it)

In the future:

New gun sounds (or ripped gun sounds)
better reload animation

Any W3D file not approved within Renguard will automatically disconnect you from the network.
You will need to run game2.exe to use/test it.

A few things missing :

- 1.) No texture
- 2.) No back-animation
- 3.) No Fire animation
- 4.) Ammo-pick-up animation...

Anyone going to fix this ? Cause the rifle works silly on Renegade right now .

Bumping old topics is bad.

How often do you do this, I've seen you do it before.
