Ok here is the problem...

I went and bought Command & Conquer The First Decade and i wanted to play on renegade so I installed it and then as told by my freinds i got renguard and installed it properly. Finally once everything was installed i went on to try multiplayer once i had logged in it said.....please install this game again without a non shared cd key.

then i clicked ok and no servers were coming up.

could someone please help me. A.S.A.P

ThankYou

I only just got the game Yesterday

I think someone may have downloaded the game off filessharing then got used keygen or something and it generated my key

but i am not sure

Well if there is a keygen out there for renegade, it wouldn't hurt if you searched for one so you can play the game you payed money for.

Though ive never heard of one for renegade b4.

hmmmm maby
but there are sites like <link removed>
which have renegade there but when i try it
it just says serial banned for 984 days
so i uninstall

maby i need to patch it
but i downloaded the Renegade_1037_English
and when i go to install it says file mission
then stops

(single player works but multiplayer dosnt)

EDIT BY NIGHTMA12: i removed the link, please dont post link to piracy sites

<http://www.renegadeforums.com/index.php?t=msg&th=19368&a mp;a mp;start=0&rid=735>

Read the first post in that thread then download the attached file.

Use it with the Renegade serial that came with TFD, and everything should work fine.

If that doesn't work, you'll need to contact Strike Team at www.strike-team.net, or EA technical support with proof of purchase to get a new serial.

Another note: TFD comes with renegade already patched up to 1.037, so there is no need to download/install any patches.

I had that problem too...I just waited a while, and it eventually fixes...weird, I know, but after 3 months, it worked again
